Updates on Local Economy

S&P's Downgrade of Bangladesh's Outlook Signals Concerns About Economy-BS&P Global Ratings has revised the long-term rating outlook for Bangladesh from stable to negative, due to a weakened liquidity position and concerns over the country's current domestic political conditions, which could impact future policy responses. The sovereign credit rating remains unchanged at 'BB-' for long-term and 'B' for short-term. The negative outlook reflects the risk of further deterioration in the country's external liquidity position over the next 12 months, which may lead to a potential downgrade in the credit rating if the external position worsens significantly. Bangladesh's economy is expected to expand at a moderate pace of 6.0%-6.4% over the next three years, and the external profile remains under pressure despite the introduction of IMF funding facilities.

Value-Added Tax Collections from Large Taxpayers Increase Despite Economic Slowdown -During the last financial year (2022-23), Bangladesh experienced a notable increase in Value Added Tax (VAT) collection from large companies, despite less-than-expected overall economic growth. Stakeholders attribute this surge in VAT revenues to higher commodity prices, particularly of import-dependent goods, as well as strategic measures like elevated supplementary duty and VAT rates and improved VAT officer supervision to curb evasion. However, some sectors, such as banking and insurance, witnessed modest or negative growth in VAT collection due to the economic slowdown and reduced business activities in those industries.
